+ Dragon Boat Racing Event

CCA coordinated with the Ithaca Dragon Boat Club for the Dragon Boat Racing event in CASS Park, Ithaca. Dragon Boat racing was a cultural activity Chinese people celebrated the 5th day of the 5th lunar month of the Chinese calendar. Dragon boating was held to avert misfortune and encourage rains for prosperity. The main object of their worship was the dragon, hence the name 'dragon boat racing'.

+ Corning One-on-One Donation update

Through the One-on-One Donation program, Corning employees based in China and Corning Chinese Association members from Corning Headquarters strive to relieve tuition burdens for Yingjing families. Donations help with school expenses and provide basic education supplies to improve local teaching environments.

Through donations and educational opportunities like Corning's Glass Class, Corning volunteers in China are making a difference for financially disadvantaged children.

+ Culture Day with CCC (Corning Community College)

On Friday, May 5th, CCA members joined the CCC 2nd Annual Celebration of Culture Day from 10:00am - 2:00pm at the Commons Building on the CCC main campus. The Day was about celebrating diversity and culture. It was very much being driven by the CCC students with support from staff and faculty. We met the CCC campus community and visitors, a few CCC club members, and other community organizations/businesses

+ In celebration of Asian American and Pacific Islander (AAPI) Heritage Month

In celebration of Asian American and Pacific Islander (AAPI) Heritage Month, Corning World is sharing the stories and reflections of some of our employees. AAPI Heritage Month recognizes the historical and cultural contributions of individuals and groups of Asian and Pacific Islander descent to the United States. The observance is celebrated in May to commemorate the immigration of the first Japanese people to the United States on May 7, 1843.

CCA member, Franki Chan shared his story of how cooking traditional foods became his way to connect with his heritage while living abroad, and he enjoyed sharing traditional family recipes and new Asian ones with others in his new homeland.

Franki Chan shares his culture through traditional Chinese cuisine.

+ CCA Member Introduce Corning Glass Technology to Students in China

CCA member Hank Wang, went to the Chongqing Yew Chung International School (重慶耀中國際學校) in China as a parent speaker to introduce the glass technology that Corning provides to human society.

The students learned that technology is not something that only related to the scientist, but also in our daily life. "When you open your eyes, you will see that technology is making our life easier. You are using mirrors to check if you have your face well cleaned, you have windows that allow sunlight to come through, and during the day you have other technologies to help you." The school news post said. The presentation opened the students another window for them to think more about how helpful and amazing glass technology is. The students reflected on what they have learned, and they are going to create something that involves technology to share with the community.

+ CCA Member Accomplishment

Corning's Lingyan Wang Selected For The 2023 Women To Watch Summit

Corning Inventor Lingyan Wang holds 10 U.S. patents and several international patents. In addition, she has produced 52 publications with over 6,000 citations. Her interest in nanostructured materials led to ceramics research. After joining **Corning Inc.**, she designed a magnetic nanoparticle for biological separation, which launched as a product for the cleanup required to remove the mineral oil, dyes, salts, and other impurities from DNA samples. While working on research projects, she often joins volunteers at the Corning Museum of Glass. In addition, she supports summer science fairs for high school students and college interns at Corning and serves in the Corning Technology Women's Network.
